Remarks: Day time ☀ Night time ★ Early morning ☀

Be careful about Heatstroke!!

In Japan, it is very hot and humid in summer which may make you feel sick or in worst case, it may put your life at risk.

This is called “Netchusho” in Japanese.

Symptoms of Netchushou are dizziness, feeling sick, headache, difficulty in moving hands and feet, shivering, fever, etc.

In this case

Take a rest at a cooler place, cool down your body, drink water, and have salty food.

To avoid heatstroke

- Use a hat and an umbrella
- Wear clothes which keep your body cool
- Do not go out in a hot day
- Drink water
- Take salty foods
- Use an air conditioner or an electric fan indoors, even when in bed.

How to cope with heatstroke under COVID 19

Recently, 7th wave of COVID 19 is prevailing.
As symptoms of Heatstroke and COVID 19 are similar,
please note as follows;

1. You may remove a mask outside.
2. Keep wearing a mask in crowded places
and also while indoors.
3. Keep silent when you eat, and restart talking
when putting mask on after meal.
4. Carry on good practices as ever such as washing hands rinsing
your mouth.

Natural disaster

In Japan, we have many natural disasters such as earthquakes and floods.

Especially in Toyama you must be careful about floods when it rains heavily, since Toyama city is surrounded by major rivers such as the Jinzu and the Johganji river.

At first, check a hazard map in which you can find the nearest evacuation point from your place.

<https://www.city.toyama.toyama.jp/kensetsubu/kasenseibi/kozuihm-chizu.html>

If you cannot find an evacuation place, please move to a place remote from the river or to a higher place.

The alert levels are shown as under.

These levels will be broadcast on TV and radio.

When it is likely to have a heavy rain suddenly, prepare the followings:

1. Handy stuff (Minimum foods, a flash light, a portable radio etc.)
2. Check the nearest evacuation place and routes to reach there.
3. If you cannot find any evacuation place, ask neighbors
 - In Japan, it is commonly set up "Jichikai" (residents association) in every small community. They will help you.

Please check a hazard map habitually just in case.

Alert levels are classified as follows;

- This is printed black and white, but in a color version, alert levels are indicated by colors, i.e. Alert level 1→White, Alert 2→Yellow, Alert 3→Red, Alert 4→Purple, Alert 5→Black

| Alert Level | | New Evacuation Information |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| 5 |  Disaster occurrence/ Disaster impending | Emergency Safety Measures ※1 |
| ~~~~<Be sure to evacuate by Alert Level 4!>~~~~ | | |
| 4 |  High risk of disaster | Evacuation Instruction ※2 |
| 3 |  Risk of disaster | Evacuation of the Elderly, Etc. ※3 |
| 2 |  Weather worsening | Heavy Rain, Flood, or Storm Surge Advisories (Japan Meteorological Agency) |
| 1 |  Risk of weather worsening | Probability of Warnings (Japan Meteorological Agency) |
